### ***Drawings***

1. The drawings are objected to because figures do not have numeral 4 (see Specification, eg., page 4, line 33). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

Art Unit: 2815

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (c) BRIEF SUMMARY OF THE INVENTION.
- (d) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (e) DETAILED DESCRIPTION OF THE INVENTION.
- (f) CLAIM OR CLAIMS (commencing on a separate sheet).
- (g) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

3. The references of interest are cited: Kim et al. (US 6,232,563 B1), Efland et al. (US 6,683,380 B2), Watanabe (US 4,987,562), and Wennekers (US 4,979,003) disclose a device, eg., a transistor comprising a semiconductor element having a first and an opposed, second side, said at least semiconductor element comprising first, second and third bonding pads and its connections contact pads. However, none of the reference(s) discloses having the first side faces of the first and second contact pads are facing the first side face of the third contact pad and are separated by spacing that is continuous along the first side faces, wherein said side faces of the first and second contact pads are facing each other and comprising a first part and a second part, the first part located nearer to the first side face than the second part, and wherein said first parts of the second side faces of the first and second contact pads are at a mutual distance that is smaller than the distance between the second parts of these side faces as set forth in the claimed invention.

***Conclusion***
